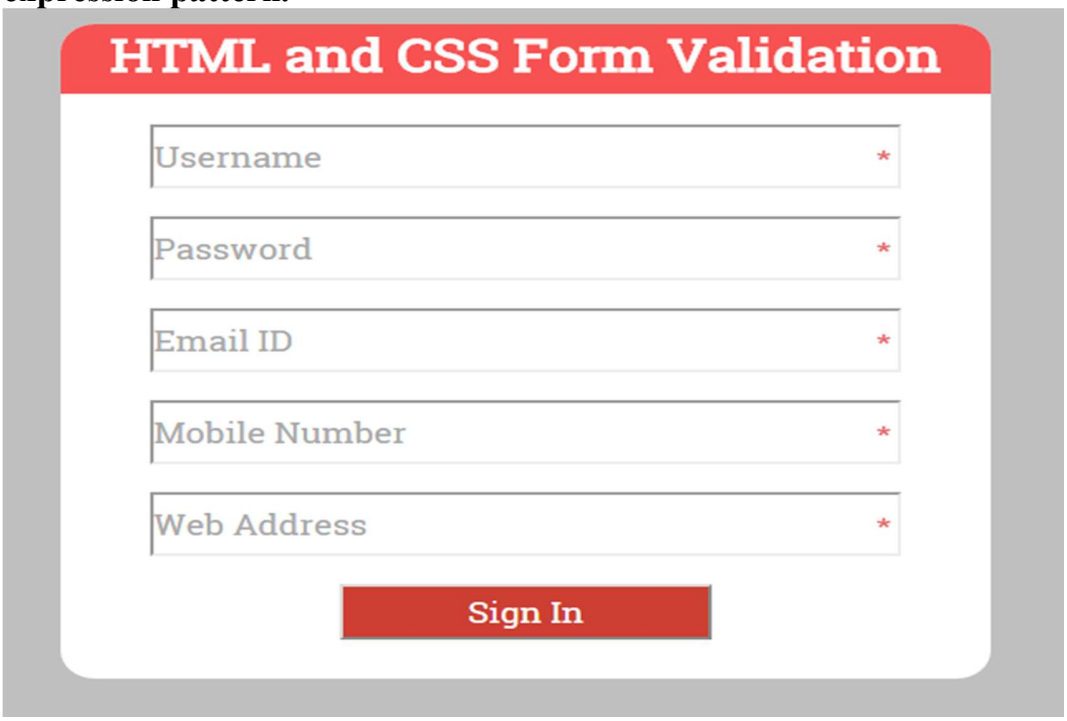
Design the following Form and validate all form components with proper regular expression pattern.



Constraints:

- **All Form components should be created as a mandatory field (Should not be left as blank). You can use asterisk symbol in text box and to notify this warning to user.**
- **Write Regular Expression Patterns for Name, Password, Email ID, Mobile Number, and URL with HTML pattern attribute.**
- **If the input date is not valid then display the textbox with Exclamatory Symbol and red color border.**
- **If the input date is valid then display the textbox with Tick Mark Symbol and Green color border.**
- **All Icons (Asterisk, Exclamatory Symbol, and Tick Mark Symbol can be downloaded form Moodle Course Home Page.**

Note: Do not use JavaScript or Any other libraries for creating pattern and validation. You are expected to use and learn only HTML5 Pattern and CSS3 Pseudo Class syntax for validation.
